Dmitry Tchoomak

+7(917) 595-26-46 | dmitry.tch@gmail.com | dnm_t | Moscow, RU

Profile

Software engineer with 18+ years of experience in media systems and video processing, including 13+ years combining technical leadership with hands-on development.
Specialization: media streaming, cross-platform services and applications, transcoding, CCTV/VSS, IPTV/OTT, DRM.
Proven track record of delivering products from prototype to productionin high-load environments.
Certified Widevine Implementation Partner.

Education

RSREA, Ryazan State Radio Engineering Academy — Ryazan, RU | 2000 - 2005
Engineer's degree, Information Systems and Technologies

Certification

Widevine Modular DRM — Kirkland, WA, US | 2015
Certified Widevine Implementation Partner

Widevine Classic VOD Packager — Kirkland, WA, US | 2014
Certified Widevine Implementation Partner

Experience

Head of Media Solutions Development — Netris | 2012 - Present

- developed a passenger online information video system for the Moscow Metro; in production since 2018
- led and participated in development of a cross-platform (Linux, Windows, macOS) client for CCTV systems under the "Safe City" state program; in production since 2020
- led and participated in development of IPTV/OTT services and STB clients; in production since 2013
- led development of a Digital Signage system based on Android TV
- built productive collaboration with BOE, Rockchip, Amlogic, Huawei, HikVision, Dahua, Maxima Telecom, Eltex, Google/Widevine, Verimatrix, Ericsson, IBM, Cisco

Software Engineer — Smartlabs | 2008 - 2012

- developed video server subsystems (VoD, nPVR, TSTV) for an IPTV/OTT platform
- developed a restreamer-transcoder from various sources (YouTube, BBC, Blackmagic Design SDI)

Software Engineer — Easy Trace Group | 2007 - 2008

- developed an adhesion splitter for vectorized topographic contour lines
- developed a data export utility from a vectorizer to GIS

Software Engineer — BuisnessInterSoft | 2003 - 2007

- developed a data import utility from RDBMS into a native XML-based ODBMS
- developed a POS system

Skills

- C++ 17, Java, QML, SQL, XML/XSLT/XPath/DOM/SAX
- Qt 6, STL, boost, NDK, JNI, ffmpeg, Intel MediaSDK, Widevine
- RTSP, HLS, DASH, RTMP, AMQP, RMQ, TCP, UDP, IP, MPEG-TS, H.264, HEVC
- clang, gdb, sanitizers, Valgrind, GammaRay, clang-tidy, clazy, git, qmake, cmake, bash, jenkins, redmine
- Linux, Android, macOS, Windows
- multithreading, networking, IPC, design patterns, OOP, software architecture

Languages

Russian - native
English - B1 intermediate

Interests

WebAssembly, Rust, Zig, Spring, Homelab
